First Trimester Screen & NIPT Bundle

**\$1,321 value,
for only \$949**

intuitionprivate.com.au

Combined First trimester screening (cFTS) and non-invasive prenatal testing (NIPT) are tests that provide information on the health and wellbeing of your baby.

cFTS and NIPT can assess if your baby is likely to have certain chromosome conditions such as Down syndrome, Trisomy 13 or Trisomy 18.

The Combined First Trimester Screen (cFTS) is an important test for other valuable information such as:

- Accurately date your pregnancy
- Checking your baby's early development
- Identify any spinal, cardiac and placental conditions
- Screen for Pre-Eclampsia

cFTS should therefore ideally be performed in conjunction with NIPT, however it is also effective on its own if you have chosen not to have NIPT. Having both helps ensure comprehensive first trimester care.

Included in your care bundle is genetic counselling to provide guidance on your pregnancy testing options.

Our experienced genetic counsellors specialise in explaining the advantages, disadvantages and limitations of genetic testing and can help you make an informed decision that is right for you and your family.

All blood tests can be performed at the Intuition Private clinic. Ultrasound appointments are available on weekdays, as well as Saturdays.

Bundle Inclusions

- Genetic Carrier Screening
- Genetic Counselling by our Genetic Counsellor
- Viability Scan
- First Trimester Nuchal Bloods
- Pre-Eclampsia Screening
- NIPT*
- Early Structural Anatomy Scan
- Scans completed, and reported on by Intuition Private Maternal Fetal Medicine Specialist

**\$1,321 value,
for only \$949**

Dr. Rajit Narayan is an Obstetrician and Gynaecologist with a sub-specialty in Maternal Fetal Medicine.

*Genome-wide NIPT option: additional charge of \$25 applies. Three-Gene Reproductive Carrier Screen included. *Bundle may include applicable Medicare bulk-bill services & therefore bundles are only available to Medicare eligible patients. Single pregnancy pricing, please ask for multiple pregnancy pricing. All tests are considered screening tests not diagnostic tests. Complex or high-risk patients may require further follow-up not included in the bundle. Patient may cancel bundle at any time & received a full refund (less cost of any services already used). (Medicare rebate of \$112.40; out of pocket cost only \$836.60)
